

THE UNIVERSITY OF TEXAS AT AUSTIN  
**JACKSON**  
SCHOOL OF GEOSCIENCES  
CHANGING THE WORLD OF GEOSCIENCES

**Job Opportunity in the Department of Geological Sciences  
Post-Doctoral Fellow in Climate System Science**

A post-doctoral position is available working with Professor Kerry H. Cook on abrupt climate change problems over Africa and the central U.S. using a regional climate system model that couples atmosphere, land, and ocean.

This is a one-year position, renewable for an additional year depending on performance and the availability of funds. Applicants should have an earned Ph.D. in atmospheric or a related field, such as oceanography or climate science. Experience in climate modeling and climate analysis is required, including computational skill and a demonstrated record of publication.

The start date is approximately September 1, 2009, and the starting salary is \$50,000. Interested applicants should email a CV and three references (name and email) to Tinley Hald at [thald@jsg.utexas.edu](mailto:thald@jsg.utexas.edu).

Security sensitive; conviction verification conducted on applicant selected.

The University of Texas at Austin is an Affirmative Action / Equal Opportunity Employer
