## 気象集誌論文へのアドバイス

This letter is in response to your request for criticisms concerning the English used in the articles of the Journal of the Meteorological Society of Japan. I wish to say that the sentence structures and the choice of words are sometimes not proper. However, in spite of these defects, I personally do not have any difficulty in understanding the scientific contents of the articles. It may be desirable to improve the English expressions of Japanese authors. But, this may require additional cost in the publication of the journal. I feel that this additional cost is not warranted.

Sincerely yours,

mariano a. Estoque /ch.

Mariano A. Estoque (マイフミ大学 気象・海洋物理学部)

気象集誌論文へのアドバイス

I have found the <u>Journal of the Meteorological Society of</u> <u>Japan</u> to be very useful to me in my research. This has been particularly true in the last several years because of my interest in AMTEXrelated papers. I consider it a first-rate scientific journal that makes an important contribution to the dissemination of scientific results. I have also found that the quality of the writing seems to have improved over the last few years. I seldom have any problem understanding the meaning of the authors. Occasionally, however, grammatical errors do occur. The only suggestion that I can offer to reduce these errors would be to have a technical editor who is well versed in English make corrections in the final version of articles.

Sincerely,

Hand H Connor

Donald H. Lenschow (アメリカ国立大気研究所 (NCAR))

In response to your letter of 20 May, 1978, I wish to say that in my opinion the Journal of the Meteorological <u>Society of Japan</u> does a quite adequate job in producing articles in understandable English. I do not believe that the additional expense which would be required to put every article into <u>exact</u> idiomatic English is necessary. You are to be congratulated for producing a fine journal.

Yours truly, R. Holton (ワシントン大学大気科学部)
