「WMO 診断と長期予報に関する国際研究集会」のお知らせ

WMO Training Workshop on Diagnosis and Prediction of Monthly and Seasonal Atmospheric Variations

WMO 主催の表記研究集会が、下記の通り開催されます。この国際会議は、米国・メリーランド大学(1985)フランス・ツールーズの気象学院(1987)での開催に続くものです。研究集会のうち第1週は、主に開発途上国の関係者を対象とする長期予報技術の研修に当てられますが、第2週は招待講演及び一般講演が行われる予定です。一般講演の申込み切(アブストラクトを含む)は1990年4月15日です。

記

1. 開催期間: 1990年10月8日~19日(一般講演等は10月15日~19日)
2. 開催地: 中華人民共和国, 南京市, 南京気象学院
3. 主なトピック(第2週)
 1. Overview of the long-range weather regime 1986-1989.
 2. Diagnosis and analysis of important abnormal

weather phenomena and the statistical and empirical methods used in monthly and seasonal forecasting.

3. The application of numerical and dynamic methods in the diagnosis and forecast of atmospheric variations.
4. General circulation models and air-sea interaction used in diagnosis and prediction of monthly and seasonal atmospheric variations.
5. The application of outside forced factors in long-range weather forecasting.
6. Long-range forecasting today and strategy in the future.
