第11巻 2015年11月 目次

H. SAITO, and H. MATSUYAMA: Probable Hourly Precipitation and Soil Water Index for 50-yr Recurrence Interval over the Japanese Archipelago	118-123
Jie LI, Huabin DONG, Limin ZENG, Yuanhang ZHANG, Min SHAO, Zifa WANG, Yele SUN, and Pingqing FU: Exploring Possible Missing Sinks of Nitrate and Its Precursors in Current Air Quality Models —A Case Simulation in the Pearl River Delta, China, Using an Observation-Based Box Model	124-128
Seungbum HONG, Seon Ki PARK, and Xing YU: Scheme-Based Optimization of Land Surface Model Using a Micro-Genetic Algorithm: Assessment of Its Performance and Usability for Regional Applications	129-133
Mariko OGAWA, Satoru OISHI, Kosei YAMAGUCHI, and Eiichi NAKAKITA: Quantitative Parametric Approach to Estimating Snowflake Size Distributions Using an Optical Sensing Disdrometer	134-137
Hiroaki KAWASE, Chieko SUZUKI, Noriko N. ISHIZAKI, Fumichika UNO, Hajime IIDA, and Kazuma AOKI: Simulations of Monthly Variation in Snowfall over Complicated Mountainous Areas around Japan's Northern Alps	138-143
Takeshi ENOMOTO: Comparison of Computational Methods of Associated Legendre Functions	144-149
