

日本気象学会英文レター誌 SOLA
 (Scientific Online Letters on the Atmosphere)
<https://www.jstage.jst.go.jp/browse/sola/>

第16巻 2020年7月 目次

- Kohei FUKUDA, Kazuaki YASUNAGA, Ryo OYAMA, Akiyoshi WADA, Atsushi HAMADA, and Hironori FUDEYASU: The Diurnal Cycle of Clouds in Tropical Cyclones over the Western North Pacific Basin 109-114
- Rimpei KAMAMOTO, Kenji SUZUKI, Tetsuya KAWANO, Hiroshi HANADO, Katsuhiko NAKAGAWA, and Yuki KANEKO: Ground Validation of GPM DPR Algorithms by Hydrometeor Measurements and Polarimetric Radar Observations of Winter Snow Clouds: A Case Study on 4 February 2018 115-119
- Atsushi INAGAKI, Yovita WANGSAPUTRA, Manabu KANDA, Meral YÜCEL, Naoyuki ONODERA, and Takayuki AOKI: Inner and Outer-Layer Similarity of the Turbulence Intensity Profile over a Realistic Urban Geometry 120-124
- Takafumi MIYASAKA, Hiroaki KAWASE, Tosiya NAKAEGAWA, Yukiko IMADA, and Izuru TAKAYABU: Future Projections of Heavy Precipitation in Kanto and Associated Weather Patterns Using Large Ensemble High-Resolution Simulations 125-131
